• Security Rating of Software

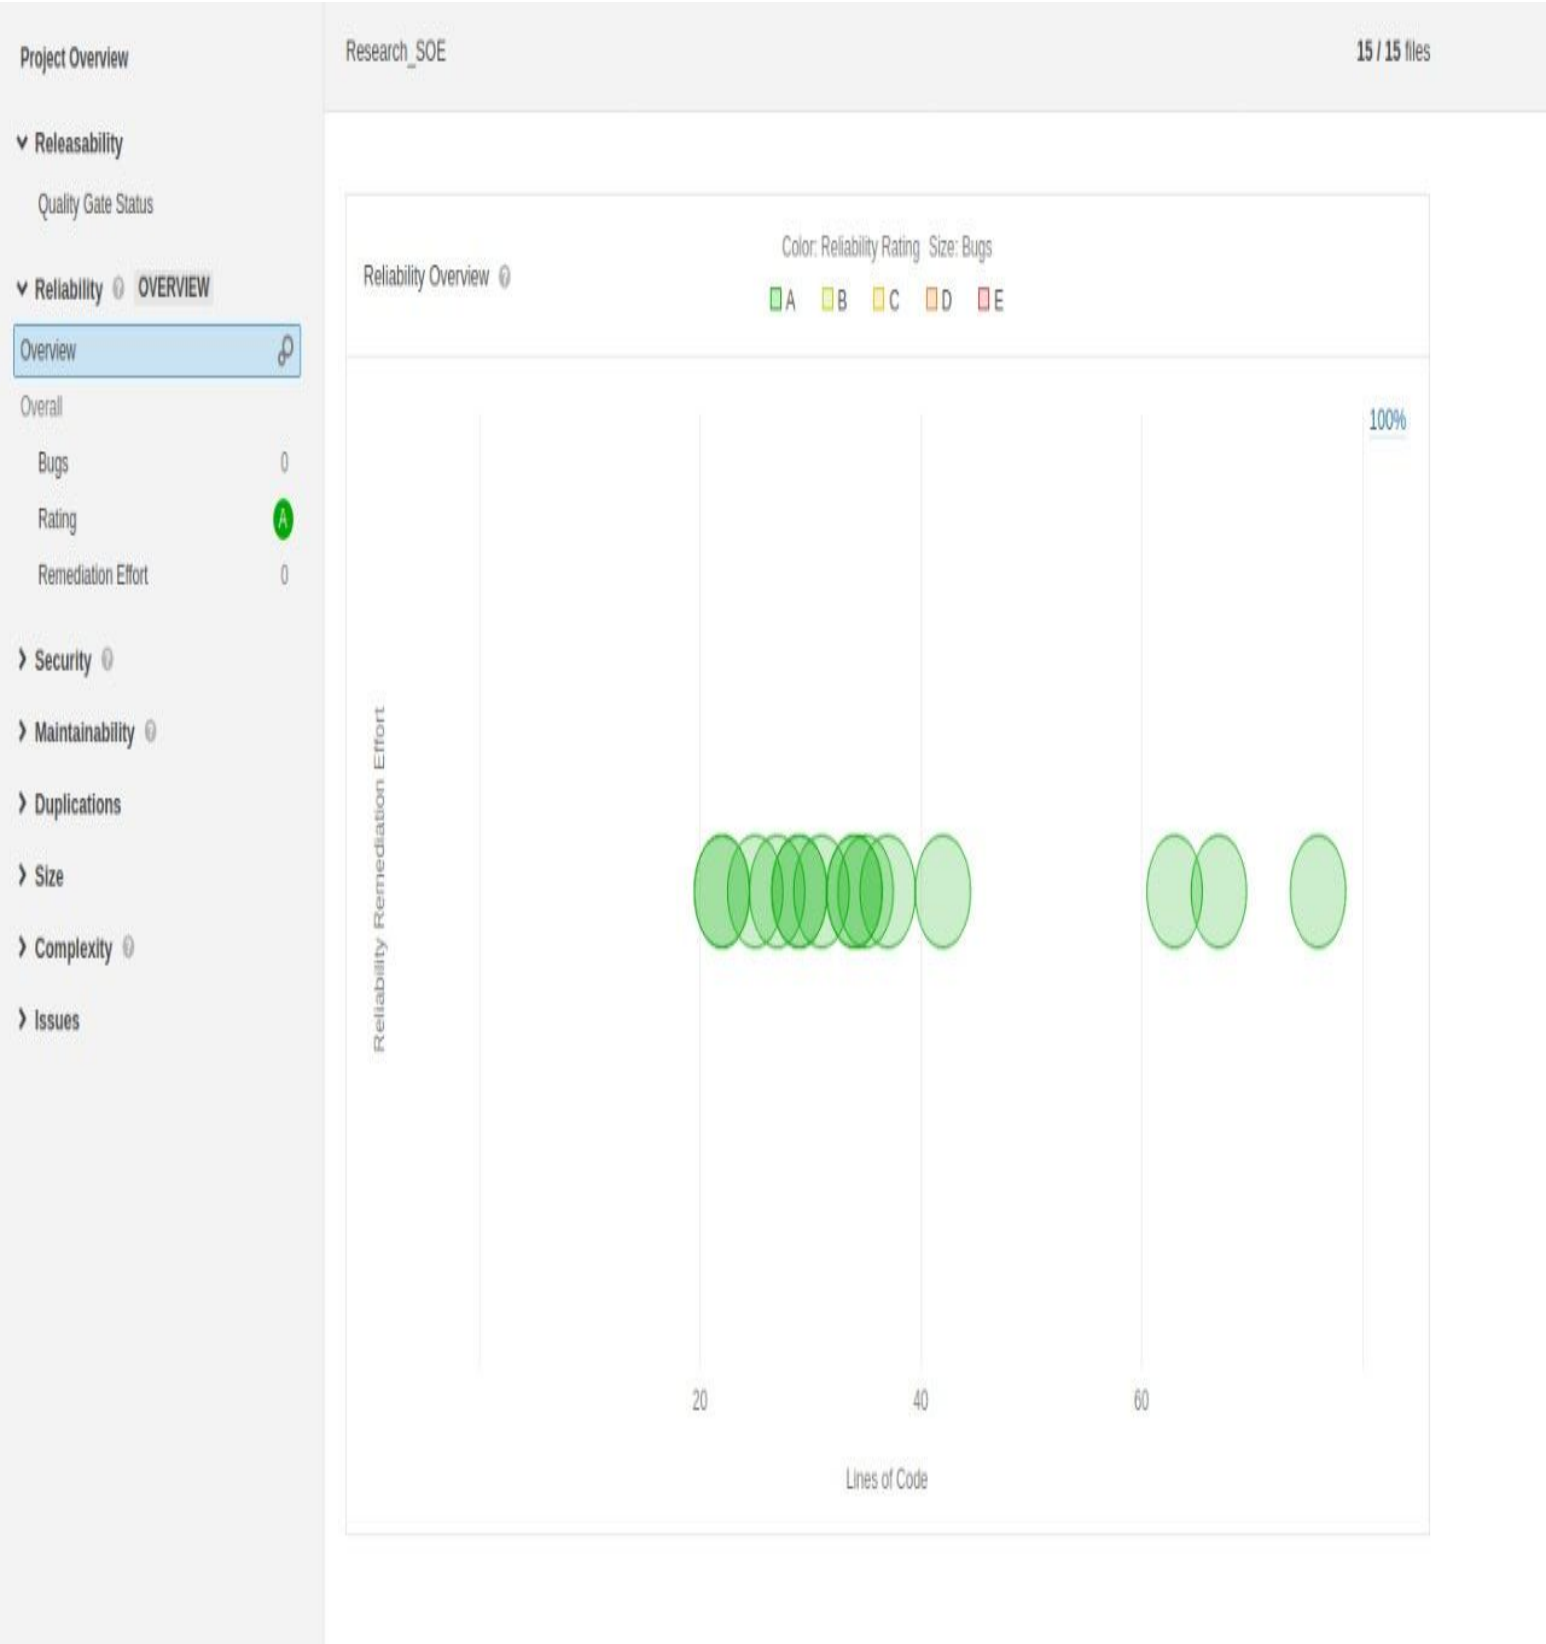

● Maintainability Of Software

● Reliability Of Software

➤ Different versions of software :-

1. **Lines of Source code** - Indicates the exact number of source code lines that are present in your source file, including blank lines.

Lines of code (LOC)

● Technical Debt w.r.t time:-

Technical Debt

- For the Final Version :-

Churn vs. maintainability

Maintainability issues cause bigger problems in files that are changed (churn) frequently.

- Properties of the Content:-
 - Complexity
